Why Canadian companies use Float for their company spending:

-  **Access unsecured 30-day credit terms**
Float offers 30-day terms with no interest in both CAD and USD. Even better? Easy early pay-down methods and you don't have to tie up assets or provide a personal guarantee to get the funds you need.
-  **Instantly create physical and virtual cards**
Issue physical cards for employees with on-the-ground expenses, or create virtual cards for subscription, software, and advertising vendors.
-  **Get greater control over company expenses**
With Float's intuitive software, you can assign individual card controls and get real time insights into your company's spending.
-  **Simplify purchase approvals**
Group members into Teams and set up approval workflows for spend requests. Put an end to paper trails and proactively approve spend in-app or via Slack.
-  **Eliminate receipt chasing and tedious expense reports**
Float's automatic SMS and Inbox receipt forwarding ensure that all spenders submit their receipts on time. Automated receipt matching eliminates the need for manual expense reports and reconciliations.
-  **Close the books faster with Float's accounting integrations**
Export all of your expenses into your accounting platform directly from Float. Exports include embedded receipts, GL and tax codes, and categories to save you time at month end.
-  **Save while your team spends**
Float provides custom insights designed to help you spend less. Plus, you pay zero transaction fees on your USD spend with Float's USD Charge Cards, and enjoy unlimited 1% cashback on monthly spend beyond \$25k.
