# HRIS Integration

Simplify employee onboarding and offboarding and sync your company's HR system.

Connect to Popular HR Systems

Float seamlessly connects with major HR systems like BambooHR, HiBob, ADP Workforce Now, Ceridian, and Sapling.

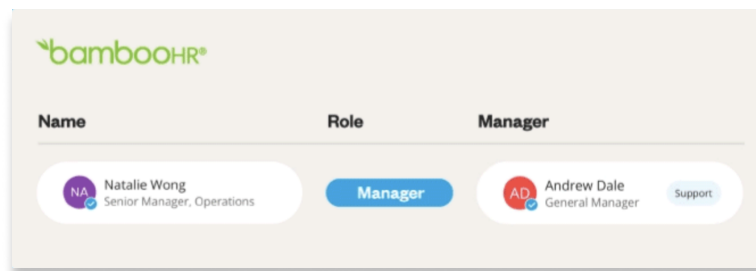

Sync Data Securely

Choose the employees you want to add to Float (and omit those you don't). Float doesn't collect or sync any personal information.

Manage Employee Lifecycle

Sync names, titles, and direct managers, view suggested users to add to Float, and automatically pause cards during offboarding.

Float Admins can connect HR systems to Float by simply going to Settings > Business Settings > HRIS Integration and clicking "Connect".
